

Acuity Brands Expands Lithonia Lighting Indoor LED Ambient Lighting Portfolio

March 1, 2011

New Offerings expand LED Lighting and Intelligent Controls Integration

ATLANTA, Mar 01, 2011 (BUSINESS WIRE) --

[Acuity Brands, Inc.](#) (NYSE: AYI; "Company"), a market leader in innovative energy-efficient lighting and control solutions, has expanded its indoor LED ambient lighting portfolio with the launch of the [Lithonia Lighting](#)(R) [ACLEDD](#), a high-quality, architectural volumetric LED luminaire and the [TLED](#), a high-quality, general purpose LED recessed troffer. These new products expand the range of Lithonia Lighting's indoor LED ambient lighting solutions, joining the [RTLED](#) volumetric recessed LED luminaire.

Enabled with [Acuity Brands' nLight](#)(R) intelligent controls interface to allow additional energy savings from day one, the [ACLEDD](#) and the [TLED](#) each deliver high-quality ambient white light for general illumination applications while reducing energy consumption, maintenance costs and a building's environmental footprint.

"The [ACLEDD](#) and the [TLED](#) are the perfect complements to the [Lithonia Lighting](#) indoor LED ambient lighting product line, giving our customers an even greater selection and flexibility when specifying high-quality LED lighting," said Dave Ranieri, Acuity Brands Lighting Vice President and General Manager, Lithonia Lighting Commercial Indoor Products. "The [ACLEDD](#) and the [TLED](#) both feature a built-in interface to the [Acuity Brands' nLight](#)(R) intelligent control system, enabling plug-and-play connectivity to occupancy sensors, photocells and manual wall controls. This maximizes the luminaires' energy-efficiency and significantly reduces the return on investment (ROI) payback period."

The [ACLEDD](#) is an indoor ambient lighting fixture featuring a classic yet contemporary architectural style, advanced LEDs and flexible controls. The [ACLEDD](#) creates pleasing volumetric light without the luminaire extending below the ceiling plane, an aesthetic commonly known as a quiet ceiling. By providing a uniform distribution of soft light, the [ACLEDD](#) creates a more productive workspace and is ideal for office, retail, education and healthcare environments. It is available in a 2'x2' configuration and features 3300 delivered lumens at 41 input watts.

The [TLED](#) is a high-performance LED fixture for general-purpose illumination, featuring nLight enabled controls, to achieve enhanced energy savings and faster ROI, and a flexible design at an exceptional value. Smooth continuous dimming functions are standard. The durable design with a classic aesthetic look is versatile, making the [TLED](#) ideal for office, retail, education and healthcare environments. The [TLED](#) is available in a 2'x2' configuration and features 3300 delivered lumens at 41 input watts.

The [ACLEDD](#) and the [TLED](#) are available nationally through [Acuity Brands' Lithonia Lighting](#) sales representatives and authorized distributors. For more information about the Company's high-quality LED lighting and controls, please visit the [Acuity Brands](#) and [Lithonia Lighting](#) web sites and [Acuity Brands' YouTube Channel](#). You can also become a fan of [Acuity Brands](#) and [Lithonia Lighting](#) on Facebook(R) and follow [Lithonia Lighting](#) on Twitter(R).
