

Acuity Brands' RELOC Wiring Solutions Expands Product Line for Extreme Temperature Environments

March 15, 2011

ATLANTA, Mar 15, 2011 (BUSINESS WIRE) --

[Acuity Brands, Inc.](#) (NYSE: AYI; "Company"), a market leader in innovative energy-efficient lighting and control solutions, is pleased to introduce the [OnePass\(R\)](#) Extreme, a new offering in its [RELOC\(R\)](#) Wiring Solutions family that is positioned for extremely low and high temperature environments.

The [OnePass](#) Extreme modular wiring system provides the same plug-and-play installation, low maintenance and cost saving benefits of the traditional [RELOC](#) system. It is ideally suited for wiring lighting applications in facilities with long-term exposure to severe temperatures, such as warehouse coolers, freezers, food distribution buildings, and unheated spaces. OnePass Extreme can be used in applications with temperatures ranging from as low as -40^o Celsius / -40^o Fahrenheit to as high as 75^o Celsius / 167^o Fahrenheit. Normal thermoplastic high heat-resistant nylon-coated (THHN) wiring systems would break down and become brittle in those extreme temperature ranges. Like other OnePass products, OnePass Extreme is UL/CUL listed.

"[RELOC](#) has been helping our customers save time and money for over 30 years," says Tim Yount, Acuity Brands Lighting Director for [RELOC](#). "With [OnePass](#) Extreme, we are responding to customers' requests to extend modular wiring solutions into applications with harsh temperature environments."

[Acuity Brands RELOC](#) Wiring Solutions has been the leader in modular wiring since 1977. RELOC offers three unique wiring systems: [Quick-Flex\(R\)](#) wiring for recessed ceiling lighting applications, [OnePass](#) for open-ceiling installations and [System 820](#) for specialty lighting and power applications.
